

FOR IMMEDIATE RELEASE

Xanadoo Selects Alianza to Power WiMAX-Enabled Voice Offering

BALA CYNWYD, PA and SALT LAKE CITY, UT – September 17, 2009 – Xanadoo, LLC, one of the fastest-growing WiMAX Internet operators in the U.S., today announced it has signed an agreement with Alianza, Inc., the leading provider of hosted voice-over WiMAX solutions, to power its new residential and small business voice offering.

Xanadoo's WiMAX-enabled voice service will be available immediately in Springfield and Decatur, IL, and Lawton, OK, and will be available in its Texas markets later this year. The new voice offering can easily be bundled with its wireless broadband service, giving residents and small business owners a new, affordable phone and Internet option.

"Alianza's well-established voice platform and expertise offered an easy, scalable voice service, which was easy to customize, integrate and manage," said Howard Verlin, Executive Vice President. "Alianza's feature-rich, WiMAX-enabled voice service is a perfect addition to our current Internet products and one that we're excited to offer to consumers in our current and future markets."

"Xanadoo is one of the elite 4G WiMAX operators in the U.S. and we are thrilled to be selected by them to help deliver valuable voice services and applications to their customers," said Brian Beutler, CEO, Alianza. "Xanadoo has a proven track record of technology innovation and market execution. We are excited to be a part of their vision of the future."

Xanadoo is at the forefront of the 4G revolution, providing affordable and flexible high-speed Internet and now voice services to communities across America's Heartland. Xanadoo's new Alianza-powered Digital Voice product offers crystal-clear, reliable phone service with unlimited local and long distance calling for only \$24.95 and is now available in its Illinois and Oklahoma markets with plans to expand to additional markets later this year.

About Xanadoo:

Xanadoo Company is one of the first and only 4G WiMAX wireless Internet operators in the U.S. to bring WiMAX to America's Heartland. Launched in 2006, Xanadoo provides innovative, mobile broadband solutions to multiple cities in Texas, Oklahoma and Illinois. In early 2009, Xanadoo launched its first 4G WiMAX markets in Springfield and Decatur, IL, with plans to expand 4G into current and future markets. Utilizing the Cisco Internet Protocol Next-Generation Network (IP NGN) infrastructure for its mobile WiMAX networks, Xanadoo is the only North American WiMAX network operator to be selected as a designated Cisco Powered partner. Visit www.XANADOO.com for more information.

About Alianza:

Alianza's award-winning hosted voice platform enables WiMAX service providers to quickly add a feature-rich voice offering to their broadband service - with no capital expenditure. Alianza offers both residential and business-class features. All core platform components are unified into a single interface, providing a seamless back-office experience. Alianza's proprietary technology, built from the ground up, provides a cost effective and customizable platform for each service provider. Alianza's customers increase market share and margin by deploying a fully integrated, white label voice solution. For more information, visit www.alianza.com.
