

Xanadoo Launches New Prepaid High-Speed Internet Service

Innovative service allows users to purchase Internet service in 7 to 90 day increments without annual service commitments or credit requirements.

(Lawton, OK) - July 9, 2008. Xanadoo Wireless High-Speed Internet today announced its new ***Prepaid Wireless High-Speed Internet*** service. Similar to prepaid cellular phone service, Xanadoo Prepaid allows users to purchase high-speed Internet access in time increments from 7 to 90 days.

“Prepaid Xanadoo is perfect for students, military personnel and other Internet users who are looking for a more flexible and cost-effective solution compared to traditional monthly Internet services”, said Phil Keith, Xanadoo’s Vice President of Marketing and Customer Management. “With Prepaid Xanadoo, customers can enjoy high-speed Internet without the hassles of fixed monthly subscription fees, annual service contracts, additional phone or cable TV service, or credit qualifications.”

Specifically, Xanadoo’s Prepaid Internet service offers:

- Wireless high-speed Internet access with speeds up to 512 kbps
- *Speed Boost* option that allows users to double their download speeds to over 1 Mbps (coming Sept 2008)
- Access in 7, 14, 30, 60 and 90 day increments through Prepaid Internet Access Cards, which are available at area Xanadoo stores, participating retailers and online
- No annual service commitments or contracts
- No phone, cable or additional service requirements
- No recurring subscription fees or monthly bills
- No credit qualifications or auto credit card payments
- Instant, plug-n-play set-up
- Wireless portability that lets users connect anywhere within our regional wireless network ... at home, the office, down the street or even across town

Diana Howl, General Manager of the Lawton region, added, “Prepaid Xanadoo is bringing a new level of control to high-speed Internet service that isn’t found with today’s subscription-based plans. Our Prepaid service allows customers to pay for high-speed service when they need it and in a way that fits their current budget.”

Prepaid Xanadoo customers initiate service by purchasing a Prepaid “Starter Kit” that includes a Zero-Install Wireless Desktop Modem and a 14 Day Prepaid Starter Card. After the initial 14 days of service, customers simply purchase additional Access Cards locally or online based on their current connectivity needs and budget.

For more information about Xanadoo’s Prepaid Internet service, please visit www.xanadoo.com, call 866.XANADOO or visit Xanadoo’s kiosk located in the Central Mall.

About Xanadoo:
